

W&OD Train

DS: I was wondering about the train that ran right behind your house in Stonewall Manor on the W&OD. So when that stopped in, I think it was '68—our exhibit describes that—but that was running behind your house.

BC: It ran right through Vienna.

DS: Right through Vienna.

BC: My kids used to go out to the end of our yard. Our yard ended here, there was some woods, and then what's now the bike trail. That also changed things a little bit. When the train would go by the conductor would blow the train and whistle and my kids would wave to them.
